

Purchase an eligible Versiv™ kit and get a second Versiv

Mainframe and FiberInspector™ Pro camera FREE!

Versiv makes your teams more productive, and for a limited time, you can double their productivity with an additional FREE second Versiv™ Mainframe and 2nd Fibre inspection camera. Purchase an eligible* Versiv kit now and get a second Versiv™ Mainframe and fibre optic camera for FREE – a €2.418 value!

WITH A SECOND VERSIV™ MAINFRAME YOUR TEAM CAN DO TWICE AS MUCH WITH THEIR VERSIV SYSTEM:

- With all eligible configurations execute Basic/Tier 1 fibre certification and inspect fibre end faces at both ends of the link without moving the tester to the far end.
- In case a DSX-5000QOi is purchased:
 - i) Certify copper cabling and perform OTDR testing at the same time.
 - ii) Perform Basic/Tier 1 fibre certification and simultaneously have the ability to either Extended/Tier 2 certify links or troubleshoot failed links with the OTDR.

Fluke Networks' FI-7000 FiberInspector™ Pro certifies fibre end-faces to the IEC 61300-3-35 industry standard in just one second, providing automated PASS/FAIL results that take the human subjectivity and guesswork out of fiber inspection.

Recent studies show that contractors that use instruments that are part of the Versiv Cable Certification System on all their jobs reduce cost of testing and reporting by up to 10% of the total job cost. That really drives profitability! Plus, you can save even more by deploying our free LinkWare™ Live SaaS to manage certification jobs anytime, anywhere, with anyone on any device.

Versiv saves you money every time you use it.
