

PRODUCT OF THE MONTH MARCH

10%
discount

Fluke Networks Product of the Month:
Buy a **MicroScanner2 Cable Verifier** now!
...and get a **10% discount**

March

April

May

June

Four months of great discounts on Fluke Network products!

*MicroScanner2 Cable Verifier.
Includes MicroScanner2 Cable
Verifier with main wiremap
adapter, multi-language Getting
Started Guide, user CD,
batteries, and Fluke Networks
carry pouch*

Make your VDV installation/maintenance jobs more efficient, reduce your test time and minimize technician errors with one easy to use cable verification tool for Active/Passive Testing, including PoE.

Did you know communications technicians have to rule out a whole host of potential cable and service issues before determining the cause of a connection problem? Is there telephone voltage? What's the polarity? Is there an Ethernet switch at the far end? Is PoE available? MicroScanner2 acknowledges this, giving them a faster, more comprehensive way to troubleshoot voice, data, and video (VDV) services.

Main features

- › Displaying key test results – wiremap, pair lengths, distance to fault, cable ID, and far end device – all on one screen.
- › Detect the presence of POTS voltage and verify polarity. Verify powered 10/100/1000 Ethernet switches at the far end. Or, confirm proper PoE voltage and pairs.
- › Test telephone jacks, Ethernet jacks, and CATV outlets right out of the box.
- › Locate Cable/Connections with Built-in IntelliTone digital and analog toning (Pro available separately).
- › Fluke Networks Quality.

Only during the month of March 2015, you can get 10% discount on the purchase of a Fluke Networks MicroScanner2 Cable Verifier. Contact your sales channel today.

PRODUCT OF THE MONTH APRIL

10%
discount

Fluke Networks Product of the Month:
Buy a **FiberInspector Pro** now!
...and get a **10% discount**

March

April

May

June

The FI-7000 FiberInspector Pro contains: Versiv Mainframe, USB Fiber Inspection Video Probe with 4 tips in a box (LC, FC/SC bulkhead, 1.25 and 2.5mm universal), Blank Module to protect the mainframe's rear connector, AC Charger, Shoulder Strap, USB Interface Cable, LinkWare Software CD, User Manual CD, Getting Started Guide, and Soft Carrying Case.

Four months of great discounts on Fluke Network products!

A fiber optic inspection scope with automated PASS/FAIL certification that allows you to inspect and certify fiber optic connector end-faces in 2 seconds so you can get the job done right the first time.

Did you know that most of the Fiber problems are due to Dirty/scratch connectors? FiberInspector Pro helps you to solve these issues by inspecting the fiber optic connector end-face and eliminating any contamination before insertion into a bulkhead or piece of equipment!

Main features

- › Certify your fiber end-faces to industry standards - IEC 61300-3-35. Or if you prefer, you can manually grade your end-faces.
- › FiberInspector Pro Automatically highlights defects found on fiber end-faces and provides Pass (green) and Fail (red) color coding per defect.
- › Store both end-face images for Documentation/ Reporting.
- › Works with LinkWare and LinkWare Live Reporting Software.
- › Works with Versiv Certification Platform (Expandable to other certification testers).

Only during the month of April 2015, you can get 10% discount on the purchase of a Fluke Networks FiberInspector Pro. Contact your sales channel today.

PRODUCT OF THE MONTH JUNE

10%
discount

Fluke Networks Product of the Month:
Buy a **Fiber Optic Cleaning Kit** now!
...and get a **10% discount**

March

April

May

June

Four months of great discounts on Fluke Network products!

NFC-Kit-Case-E: Enhanced Fiber Optic Cleaning Kit - Includes an IBC OneClick 1.25mm cleaner, an IBC OneClick 2.5mm cleaner, an IBC OneClick MPO cleaner, a solvent pen, a cleaning cube and a softcase.

Fiber Optic Cleaning Kits containing the best fiber optic cleaning tools to effectively remove the toughest contaminants in any fiber network.

Dirt, dust and other contaminants are the enemies of high-speed data transmission over optical fiber.

Today's network applications require more bandwidth than ever, making loss budgets tighter than ever.

Hence, it is critical that all optical connections are free of contaminants to avoid having application performance issue. There are as many different cleaning techniques as there are fiber optic network technicians. While some techniques work some of the time, reliable and lasting performance of your fiber links require inspection and proper cleaning processes with every mating. Fluke Networks' Fiber Optic Cleaning Kits contains the best fiber optic cleaning tools to effectively remove the toughest contaminants in any fiber network.

Main features

- › Inspect every end-face first. If it is clean, then it can be inserted as is. Most likely, it has accumulated some form of contamination and needs to be cleaned right before insertion.
- › Our Cleaning Kit supports all fiber connector types in datacenter and campus environments.
- › Clean End Faces with the IBC 1.25mm or 2.5mm Cleaner or with IBC MPO Cleaner.
- › Clean patch cords with a Cleaning Card or Cleaning Cube.
- › For years isopropyl alcohol (IPA) was used to clean fiber end-faces, but now there are customized solvents that are far superior, such as Fluke Networks' Fiber Optic Solvent Pen that precisely dispenses specially formulated fiber optic cleaning solution.

Only during the month of June 2015, you can get 10% discount on the purchase of a Fluke Networks CableIQ Qualification Tester. Contact your sales channel today.
