Hallbergmoos, June, 11th 2013

Dear Christian

Dätwyler Cables GmbH has evaluated the VERSIV / DSX-5000 CableAnalyzer™ in our laboratories. The test results obtained with this field tester correlate very closely with tests performed with laboratory equipment as well as the DTX-1800.

Therefore we endorse the VERSIV / DSX-5000 and below adapters for field-testing of our Dätwyler Cabling Systems.

- Permanent Link Adapter DSX-PLA004
- Channel Adapter DSX-CHA004
- ... for use in testing Class D, E and E_A System Installations and

- TERA Permanent Link Adapter DSX-PLA011
- TERA Channel Adapter DSX-CHA011
- ... for use in testing Class F and Class F_A System installations

We look forward to a continued cooperation and future opportunities to evaluate Fluke Networks products that can be used to test and certify our cabling installations in the field.

Sincerely

Dätwyler Cabling Solutions
